

PUBLIC NOTICE

Beginning August 26th, the Town of Julesburg will begin trimming trees that are interfering with the Town's electrical power lines. Trees that have branches within 5' of the power lines will have the branches removed since the branches are interfering with the serviceable space needed to conduct electricity. The Town will only focus on the branches within the serviceable space of the power lines. Should your tree need a more thorough pruning, you should contact one of the two tree trimming services that are licensed through the Town of Julesburg. The tree trimming services are Gary Jeppson with Jeppson Services and Jeff Vidal with J&J Tree.
